

## **Freedom Star Block #6**

**February 8, 2010**

### **Diamond Star Block**

Finished Block Size – 12” x 12”

This is such a stunning star. You can use the colors shown, or choose your own. Be careful when choosing your fabrics that you have a strong contrast between the top star and the bottom star, and between the bottom star and the background. This will make the star points pop. And if you are careful when selecting the light and dark fabric for each star section you can create a star with dimension.

You will have to print out the paper-pieced PDF Pattern. And make a total of four copies.

To help with color placement:

A1 and B1 are background (dark blue)

B2 is the darker side of the under star (dark gold)

A2 is the lighter side of the under star (med gold)

B3 is the lighter side of the top star (med red)

A3 is the darker side of the top star (dark red)

Stitch out four of each section (A & B) being careful of where you place your light and dark star fabrics. It may help if you follow the color photo. First sew each set of two sections together to make four larger sections. Then sew all four sections together to make the complete star.
